IN EACH EARTH ACTION campaign, hundreds of groups take action simultaneously around the world. Even if some groups only spend a few minutes to take one of these steps, it all adds up.

Experience shows that follow-up phone calls to legislators or journalists, asking whether they received the materials, and whether they plan to take action or write on the issue, increases the chances of the materials being used.

All the materials in this Action Kit can be reprinted or reproduced without special permission. Please acknowledge EarthAction as the source and send us a copy of where reprints appear.

Please take a moment to send a copy of whatever you send out on this issue to any EarthAction office. We would also be most grateful for copies of any newspaper articles in your local press where EarthAction's materials may have been used.

Good luck and many thanks.

EarthAction Kits and their component parts are available in electronic form on our website at: WWW.EARTHACTION.ORG.

Put a link on your website to Earth-Action's IYDD web page. A graphic with simple linking instructions is posted at: WWW.EARTHACTION.ORG/IYDD/LINK.HTML.

CAUSE EFFECT

 EARTH ACTION is a global network of legislators, groups and individuals taking action together to create the political will for a more just, peaceful and sustainable world.

 **THE INTERRELATED** global problems of environmental degradation, poverty, war and human rights abuse threaten everyone's future. These problems can be solved. All that's lacking is the will.
