

POSTTIDNING B

Stockholm Environment Institute
Box 2142
SE-103 14 Stockholm
Sweden

The Stockholm Environment Institute (SEI) is an international research institute focusing on local, regional and global issues related to environment and development.

The scientific and administrative work of the Institute is co-ordinated by SEI's headquarters in Stockholm, Sweden, with centres in Boston (USA), York (UK), and Tallinn (Estonia).

In addition, SEI works with an international network of independent scientists and research institutes located throughout the world.

This newsletter is published by SEI's Energy Programme with support from the Swedish International Development Cooperation Agency (Sida). The Energy Programme is concerned with energy and environmental issues in developing countries. Studies are carried out in close cooperation with local institutions.

The views expressed in the articles in this newsletter are those of the authors and not necessarily those of SEI.

For further information, or if you would like to receive this newsletter, please contact **Solveig Nilsson**, SEI Energy Programme. This newsletter is distributed free of charge and is also available on SEI's WWW site.

ENERGIA – International Network on Women and Sustainable Energy

ENERGIA is an International Network on Women and Sustainable Energy, founded in 1995 to create an institutional base for galvanising action to strengthen the role of women in the energy sector. Energia is open to both men and women from the South and North interested in promoting its goal to “engender” energy and “empower” women, through the promotion of information exchange, training, research, advocacy and action aimed at sustainable energy development that is equitable for all. ENERGIA's approach is to seek to identify needed activities and actions through its membership, and then to encourage, and if possible assist, members and their institutions to undertake decentralised initiatives. Energia News is the principle vehicle for this approach.

A typical issue of ENERGIA News comprises: an editorial, letters to ENERGIA, reports from networking around the world, a feature focusing on an international or regional organisation or program, 2–4 articles and case studies, training resources, internet resources, and a bulletin board. Eleven issues have been published since 1996 and all these can also be found on the web page at <http://www.energia.org>. At present *ENERGIA News* has 1297 subscribers (about a quarter of whom are men) in 247 countries, with 60 % of subscribers in developing countries.

ENERGIA News is produced jointly by Energy, Environment and Development (EED, Kurten, Germany), the Technology and Development Group (TDG, Enschede, the Netherlands) and ETC Energy (Leusden, the Netherlands) which houses the secretariat. The focus is on

practice, with a conscious effort to *interpret* and *learn* from this practice.

Subscribing to *ENERGIA News* is free of charge but we do ask in exchange that our subscribers contribute to the newsletter by sending in their own articles, letters, publications, reports, notes, resources, announcements, photographs, news and events. To become a subscriber to *ENERGIA News* or with any query please contact:
