

Welcome to the new Oxfam catalogue of publications on development and humanitarian issues

Oxfam GB publishes and distributes a range of books, journals, reports, and other materials. We set out to communicate Oxfam's policy research, advocacy messages, and programme experience, and to be an active contributor to current debates in development.

This catalogue features our key in print titles, with new and forthcoming publications up to Spring 2005. You will find up-to-date information at www.oxfam.org.uk/publications

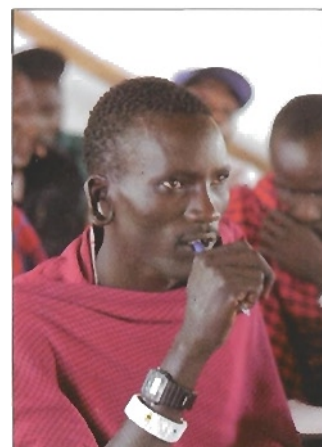

Some titles in this catalogue are published by other agencies or organisations. Oxfam GB does not necessarily endorse opinions expressed in publications from other sources.

To help you find publications that will be most useful to you, we've labelled them to show their key purpose.

Explanations and new examples for each are given opposite.

Front cover and inside cover photographs, copyright: Ami Vitale/ Oxfam 2003

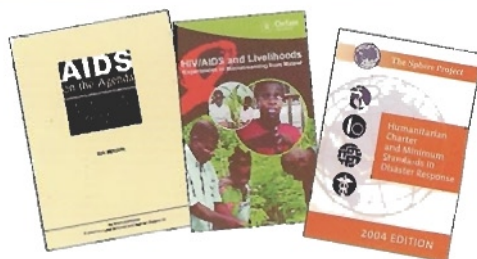

An adult education teacher attending an Oxfam-funded refresher course in Endulen trading centre, Ngongoro District, Tanzania. The teachers were chosen by their communities, and have been trained in the REFLECT methodology originally developed by Action Aid, in which literacy and numeracy are taught through an exploration of locally relevant issues – such as HIV/AIDS and land rights. These teachers provide a valuable development training link into their communities.

Management

These publications share experience from Oxfam's programme work, and aim to inform programme management and development
