GORDON & BREACH

International Journal of WATER RESOURCES

The *International Journal of Water Resources Development* covers all aspects of water development and management in both industrialized and Third World countries. Contents focus on the practical implementation of policies for water resources development, monitoring and evaluation of technical projects, and, to a lesser extent, water resources research. Articles are rigorous and in-depth, and range in approach from applied geographical analysis to the examination of strategic, economic and social issues.

Audience: Academics and researchers in the water resources field; policymakers and managers in all organizations that are affected by, or concerned with, water resources development; hydrologists, economists, sociologists, geographers, geologists, meteorologists and limnologists; lawyers and administrators; civil, mechanical and electrical engineers with an interest in this area.
