**BUILDING RESOURCES FOR
THE COMMUNITY WORLDWIDE**

Alliance is Charities Aid Foundation's quarterly magazine on the funding of civil society worldwide. It is aimed at donors working internationally (foundations, companies, governments, multilateral organisations and international NGOs); professionals working with civil society organisations; universities, other educational institutions and libraries; and all those interested in the development of civil society.

Alliance examines issues relating to the delivery of funding to civil society organisations, for example:

- how funders can promote sustainability
- self-regulation and accreditation of NGOs
- measuring results
- the use of grantmaking intermediaries to channel support to grassroots organisations
- the changing role of civil society in different parts of the world
